

Replacement PTAC Chassis for Remington/ Singer/ American Standard TW Type '41', IslandAire '41' & RetroAire 'RC 15'

NOMINAL CAPACITY:

9,000, 12,000, 15,000 BTU/h

ColdPoint Corp, Rome, New York 13440 • Phone (315) 339-2331 • Fax (315) 339-2358 • Web: www.adirondackaire.com

centrifugal condenser fan

MADE IN USA

Description:

Adirondack-Aire '41' Series is a direct replacement for Remington/ Singer Type 41, American Standard TW series Type 41, IslandAire '41' & RetroAire 'RC 15' chassis. The chassis is a part of a complete system, which consists of the chassis, blower/heat section with control box, a wall sleeve, room cabinet, and outdoor louver. The chassis contains the compressor, indoor and outdoor heat exchangers, condenser motor & fan, and refrigeration circuit controls. The '41' is dimensionally identical to the original for a fast, easy, and trouble free installation. Proven technology, quality components, careful design and testing, and the latest in reliability and efficiency advances assure long life, user satisfaction, and lower energy cost! Consider the

extensive list of standard features which includes: Rust-Block\* corrosion protection system, centrifugal condenser fan, evaporator freeze protection, permanent electrostatic air filter, pull handle, and high-pressure over protection... and Adirondack-Aire is the replacement solution the competition can't match. Cold Point Corp. backs the '41' with a customer friendly one-year parts and labor warranty and five-year compressor warranty, (see Warranty document for details). Heat pumps are available and include a thermostatic expansion valve and condenser drain pan valve. Consult factory for availability of heat pumps.

Application & Benefits:

The Adirondack-Aire '41' series replacement chassis fits the existing Remington/Singer/American Standard wall sleeves and room cabinets and works with the existing blower/heat section and control box without modification. A forward curved centrifugal condenser fan provides proven airflow performance. The standard high-pressure switch and evaporator freeze protection stops unit operation before damage occurs should airflow become reduced or obstructed due to dirty coils, obstructed airflow, or motor failures or lock-up...a premium feature usually found only in expensive commercial systems. Condensate re-evaporation and the Rust-Block system assure a stain-free building exterior. High efficiency compressors provide demonstrated reliability and low sound levels and cut energy costs...and because the chassis dimensions and construction details are like the original, replacement work is fast and easy. A chassis pull handle is provided to facilitate easy removal and handling. Using Adirondack-Aire replacements eliminates the need for room and exterior wall renovation and is the solution that gets your property back in service quickly and at the lowest total cost. Choose the optional room cabinet to give the unit a brand new look and improve room aesthetics.

Options/Accessories:

- Heat Pump (consult factory)
- Blower/control box sections
- Electric heat or Hydronic heat
- Control options
- Motorized fresh air
- Cabinets
- Line Cord
- 115V & 265/277V (availability varies by model size)

\* Rust-Block corrosion protection system consists of:  
•Heavy gauge galvanized steel construction with powder paint finished condenser & evaporator pans

•Galvanized or Aluminum Condenser Fan  
•Stainless steel compressor and condenser motor studs

•Magnaguard and/or stainless steel screws and fasteners

Standard Features

- 1). Made in USA
- 2). Designed for easy installation & compatibility. Dimensionally identical to original Singer/American Standard chassis. Replaces IslandAire & RetroAire chassis.
- 3). Exclusive Rust-Block corrosion protection
- 4). High efficiency PSC type fan motors w/built-in temperature protection
- 5). UL listed components and construction
- 6). Quiet, durable, and efficient compressor with built-in pressure & temperature protection
- 7). Heavy Gauge G60 galvanized steel construction with powder coat painted condenser & evaporator pans
- 8). High efficiency copper tube-aluminum fin evaporator and condenser coils
- 9). Centrifugal condenser fan for proven airflow performance
- 10). Condensate re-evaporation
- 11). High Pressure switch with manual reset
- 12). Frost free low ambient cooling\*
- 13). Electrostatic air filter
- 14). Chassis pull handle facilitates easy chassis removal & handling
- 15). Heat pump heating to 35°F outdoor\*\*
- 16). Capillary expansion. Thermostatic expansion valve (heat pumps)
- 17). Positive shift reversing valve (heat pumps)
- 18). Precision charged with R-22 refrigerant

\*Cooling operation locks-out at 34° F outdoor temperature and restarts @ 55° F.

\*\*Actual temperature affected by relative humidity, solar effect, etc.

# 41 Dimensions and Specifications

**Note:** Due to Cold Point Corporation's ongoing quality & product development programs, design and specifications may change. Always consult factory to verify the information provided here.
